### **DETAILED ACTION**

1. The amendment filed March 22, 2007 was entered.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. The objections to the specification are withdrawn, in light of the amendments.
4. The rejection of claims 27 and 28 under 35 U.S.C. 101 is withdrawn in light of the claim amendments.
5. The rejection of claims 21-30 under 35 U.S.C. 112, 2<sup>nd</sup> paragraph is withdrawn in light of the claim amendments.

### ***Claim Rejections - 35 USC § 112***

6. Claims 23, 24, 27, 29, and 30 remain rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention, for the reasons of record stated in the Office action mailed January 4, 2007.

Applicants traverse in the paper filed March 22, 2007. Applicants' arguments were fully considered but were not found persuasive.

Applicants argue that the amendments render the rejection moot and that the claims now encompass a narrower range of FLC2 polypeptides (response, page 9, 4<sup>th</sup> full paragraph). However, the claims encompass nucleotide sequences that encode amino acid sequences that can differ from SEQ ID NO: 4 by as much as 30% outside of the MADS box domain. This encompasses changes of up to 34 of the amino acids of residues 61-173 of SEQ ID NO: 4. The specification does not describe amino acid domains other than the MADS box that are essential to the function of SEQ ID NO: 4. The specification does not describe any species of nucleotide sequence encompassed by the claims that differ from those encoding SEQ ID NO: 4 that, when overexpressed in a plant, will delay the onset of flowering.

7. Claims 23, 24, 27, 29, and 30 remain rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the claimed seeds, plants, construction, and method wherein the protein coding sequence encodes SEQ ID NO: 4, does not reasonably provide enablement for the claimed invention wherein the encoded FLC2 differs from SEQ ID NO: 4 by as much as 50% outside of the MADS box domain. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention commensurate in scope with these claims, for the reasons of record stated in the Office action mailed January 4, 2007. Applicants traverse in the paper filed March 22, 2007. Applicants' arguments were fully considered but were not found persuasive.

Art Unit: 1638

Applicants argue that the claims are amended to recite that the sequences are at least 70% identical and therefore can vary by only 30% (response, page 9, last paragraph). However, this encompasses changes in 34 amino acids while still retaining functional activity. In the absence of further guidance, undue experimentation would be required by one skilled in the art to determine amino acid domains other than the MADS box domain in SEQ ID NO: 4 that are important for functional activity, and how residues may be altered without affecting activity.

### *Summary*

8. Claims 23, 24, 27, 29, and 30 remain rejected. Claims 21, 22, 25, and 26 are allowed.

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
